

Activity 5: Download in different formats

For this activity, you continue working with the document you created earlier. You download your Google Doc in multiple formats to see how simple it is to work across file types.

Complete the following steps:

1. Return to your Google Doc "Bakery consumer notes."
2. Select **File**, then **Download** and download your document in the following formats:
 - a. Microsoft Word (.docx)
 - b. PDF document (.pdf)
 - c. Rich Text Format (.rtf)

Do not close your Google Doc. You use it in the next activity.
