

Activity 4: Use versions and shareable links

For this activity, you continue working in the file you created earlier “Bakery consumer notes.” You save a named version, share a link to the document, make changes, and use the version history to restore a previous version.

Complete the following steps:

1. Return to your Google Doc “Bakery consumer notes.”
2. Create a named version.
 - a. Select **File, Version history, and Name current version.**
 - b. Name the version “V1” and select **Save.**
3. Select **Share** and **Copy link** to generate a shareable link. Adjust permissions so anyone in your organization with the link can view.
4. Type an extra line of text in the document.
5. Revert to a previous version.
 - a. Select **File, Version history, and See version history.**
 - b. Select the version “V1.”
 - c. Select **Restore this version,** then **Restore.**

Do not close your Google Doc. You use it in the next activity.
