

Activity 1: Start a project in Google Slides

In this first activity, you learn two ways of starting a presentation in Google Slides. First, you make a copy of an existing presentation that is stored in the Slides Assets folder to your personal My Drive. Then you create a new blank presentation from your Google Drive.

Complete the following steps:

1. Open the [On the Rise Bakery best practices sharing](#) presentation.
2. Select **File, Make a copy**, then choose **Entire presentation**.
3. Change the name to “On the Rise Bakery best practice sharing”, and click **OK** to save your copy of the presentation.
4. Close the two presentation tabs.
5. In a new browser tab, go to drive.google.com to open your Google Drive. Select **My Drive** and verify that “On the Rise Bakery best practice sharing” exists.
6. Next, create a new presentation. From your Google Drive, select **New**, then **Google Slides**. Click “Untitled presentation” and type “My presentation”.
7. Close the “My presentation” tab.
