

Activity 5: Add slide transitions and object animations

Slide transitions and animations can bring a presentation to life. This activity adds transitions and animations to your Google Slides presentation.

Complete the following steps:

1. Apply slide transitions.
 - a. Return to Slide 1 in your Google Slides presentation, “On the Rise Bakery best practices sharing_YOURNAME.”
 - b. Select **Transition** and select **Fade** from the drop-down menu.
 - c. Adjust the speed to **Medium**.
 - d. Select **Play** to see how your transition looks.
 - e. After the slide fades in, select **Stop**, then change the transition to **Dissolve** and select **Apply to all slides**.
2. Add animations to images and text.
 - a. Select the title text on the slide “Key learning from OTR Manila.
 - b. Select **Animate** and **Add animation**.
 - c. Choose **Fade in** and **On Click** and adjust the speed to **Slow**.
 - d. Select the body text and **Add animation**.
 - e. Choose **Fade in**, **After previous**, **By paragraph** and **Medium**.
 - f. Select the bulb image and **Add animation**.
 - g. Select **Fade in**, **With previous**, and **Slow**.
 - h. View the results using the **Play** button, and experiment with dragging the animations to reorder them and changing the settings.

Do not close your presentation. You will use it in the next activity.
