

## Activity 7: Import and reorder slides

For this activity, you continue working in your Google Slides presentation. You import a slide from another presentation then change the order of slides in the presentation.

Before you start:

1. Click the following link [Owners message](#) to open the presentation from the course drive.
2. Close the “Owners message” tab.

Complete the following steps:

1. Return to your Google Slides presentation, “On the Rise Bakery best practices sharing\_YOURNAME.”
2. Select **File** then **Import slides**.
3. Select the “Owners message” presentation thumbnail, then click **Select**.
4. Select the first slide then **Import slides**.
5. Select and drag the new slide to make it the second slide in the presentation. (You can also move the slide by selecting the **Slide** menu and point to **Move slide** to choose an option.)

Do not close your presentation. You will use it in the next activity.
