

Activity 8: Share a presentation and check version history

Now it's your turn. In this activity, you apply some link sharing options, check your presentation's version history, and name your current version.

Complete the following steps:

1. Return to your Google Slides presentation, "On the Rise Bakery best practices sharing_YOURNAME."
2. Select **Share**. From **General access**, select **Anyone with the link** to generate a link that anyone can access to view the presentation.
3. Click **Done** to close the Sharing dialog.
4. Check the version history. Select **File, Version history**, then **See version history**.
5. Select **More actions**, then **Name this version** and name the current version "V1."
6. Click the Back arrow to close the version history page to return your presentation.

Do not close your presentation. You will use it in the next activity.
