

Activity 2: Identify the Google Meet link and dial-in information

In this activity, you identify the optional dial-in information you need from a calendar event.

Complete the following steps:

1. Return to the event you created in Google Calendar during the previous activity.
2. Find both the Google Meet link and the dial-in information for the event. If you do not see any dial-in details, this feature may have been disabled by your organization.

Leave your Google Calendar tab open for now, as you need it again in the next activity.
