

Activity 4: Record a Google Meet video conference

In this activity, you record a meeting.

Complete the following steps:

1. Go to meet.google.com to open Google Meet.
2. Click the title of the meeting that you created earlier, and then click **Join now**.
3. Click the **More options** menu in the Meet controls at the bottom of the window.
4. Click **Manage recording**, click **Start recording**, and click **Start**.
5. Click **Stop recording**, and then click **Stop recording** in the modal.

Note: After a meeting recording stops, the meeting host receives an email in their Gmail inbox with a link to the recording. The person who recorded the meeting, if different from the host, also receives a link. It can take anywhere from a few minutes to 24 hours to receive the email depending on current network constraints.
