

## Business challenge: A case of cinnamon

In this activity, you apply what you've learned about Google Meet by helping On the Rise solve their business challenge.

During this activity, you work independently to complete five tasks.

You use files from the course drive as part of this activity. To ensure you can locate them easily when you need them, complete the following steps:

1. Click this link [MEETING AGENDA - Solving Our Cinnamon Crisis](#) to open the document from the course drive.
2. Close the "MEETING AGENDA - Solving Our Cinnamon Crisis" tab.

### Task 1

Seroja is concerned about the effect of changing cinnamon suppliers on product quality. She wants to be transparent with her team and collect their feedback. She asks you to organize a meeting and invite all her bakers and store owners together for a Google Meet video conference.

Complete the following steps:

1. Open your Google Calendar.
2. Schedule the meeting.

**Meeting Title:** Solving our cinnamon crisis

**When:** 3 weeks from now, 2pm.

**Attachment:** MEETING AGENDA - Solving Our Cinnamon Crisis

3. Ensure you add a Google Meet video conference to the event.

## Task 2

Three weeks later, you, Seroja, and her team get together for the meeting to solve the cinnamon crisis. Seroja is dialing into the meeting from her phone and cannot share her screen. As a result, she asks you to present the meeting agenda from your computer.

Complete the following steps:

1. Join the Google Meet video conference that you created in the previous task.
2. Click **Meeting details** and open the “MEETING AGENDA - Solving Our Cinnamon Crisis” document linked in the panel.
3. To share your screen using the Chrome browser, click **Present now**, click **A tab**, and then click **Share**. If you’re using a different browser, click **Present now**, then click **Your entire screen** and navigate to the **Meeting details** tab.
4. Return to your Google Meet video conference and click **Stop presenting** when you’re finished.

## Task 3

The team begins brainstorming and the bakers and store owners agree that it would be ideal to find another Ceylon cinnamon supplier. Patrizia, a baker from Rome, mentions a former colleague who sells cinnamon wholesale. She suggests inviting him to the video conference so he can present his offerings. Seroja asks you to send Giovanni, the supplier from Rome, an email inviting him to the Google Meet currently in progress.

Complete the following steps:

1. Start your scheduled Google Meet and join the meeting.
2. Use the **Add people** feature in Google Meet to invite Giovanni to the meeting that is in progress or skip this step if you prefer. (Add the person using your personal email address or invite a colleague as Giovanni). If you do invite a colleague, please do tell them in advance that this is a training exercise.

## Task 4

Giovanni joins the meeting and presents his [Giovanni Cinnamon Product Portfolio](#) presentation. However, the speaker on your computer isn’t working very well, so you’re not able to hear him clearly. You decide to turn on closed captions for yourself and inquire whether you can use the **Transcripts** feature to capture the conversation. Seroja and

everyone else on the call agrees they would like a meeting transcript.

Complete the following steps:

1. In your Meet controls, click **Turn on captions**.
2. Click **Activities** to open the panel. Select **Transcripts** and click **Start transcription**.
3. Click **Stop transcription** when you want Google Meet to stop transcribing the call.

## Task 5

After Giovanni finishes giving his presentation, he leaves the call. You want to create a poll to gauge what the other meeting attendees thought of the proposal.

Complete the following steps:

1. Click **Activities** to reopen the panel. Select **Polls** and click **Start a poll**.
2. In the box labeled **Ask a question**, type: "What did you think of Giovanni's proposal?"
3. For **Option 1**, type "Agree."
4. For **Option 2**, type "Disagree."
5. Click **Add an option**, to create a new box. For **Option 3**, type "Unsure."
6. By default, the **Responses appear without names** option isn't selected. You can select the option if you want.
7. Then, click **Launch** to publish the poll.

## Case wrap up

After you present the findings of your poll to Seroja, you both discuss Giovanni's product portfolio. Seroja agrees that Giovanni's offerings are of interest. She is pleased with the metrics Giovanni can provide regarding his firm's ability to provide good customer service and the level of Ceylon cinnamon inventory he has in stock. She agrees it sounds as though there is no problem with product availability. However, she stresses that she needs to visit in person to taste test and potentially close a deal.

Seroja thanks you for your help coordinating the discussion using Google Meet. With your help, she hopes On the Rise has found a new cinnamon supplier!
