

Activity 2: Create and use labels

In this activity, you explore how to work with labels to organize messages in your Gmail. Choose labels that are relevant to your workflow or enable the organization you need.

Complete the following steps:

1. Start by creating a few labels. To create a label, choose **More** in the label list, scroll, and select **Create new label**. Enter your new label name, and click **Create**.
2. Move messages from your Inbox to a label. Select one or more messages in your Inbox, choose **Move to**, and select a label.
3. Apply a label to messages in your Inbox. Select one or more messages, choose **Labels**, and select a label to apply to the messages without moving them from your Inbox.
