

Activity 4: Create a personal contact and group

Now you create a new personal contact.

Complete the following steps:

1. Choose the Google Workspace app launcher and select the **Contacts** icon.
2. Select **Create contact**, then **Create a contact**.
3. Enter a friend's name, surname and email address.
4. Select **Save** to save your contact.
5. Select **Edit** and change the contact's details..
6. Save your changes.

Like messages in Gmail, Contacts can also be organized with labels. Next, you apply a label to create a personal group of contacts and use it as a personal email list.

7. Select **Create label** to add a new label named "Gmail Training".
8. From your "Contacts" or "Directory" list, select one or more contacts, then drag-and-drop the selected contacts to the "Gmail Training" label.
9. Compose and send an email to "Gmail Training". Type the name of the label into the "To" field. Note: If you cannot see your new group listed in the address book, reload your Gmail window and try again.
