

Activity 8: Create a Gmail filter

In this activity, you create a filter to apply the label “Training” to messages from your instructor regarding the training session.

Complete the following steps:

1. Make sure you enable the display of importance markers. Select **Settings, See all settings**, then choose the “Inbox” tab. Select **Show markers** in the “Importance markers” section. Select **Save Changes**.
2. Create a filter by selecting the **Show search options** icon in the search box to reveal search options.
3. Use your instructor's email in the “From” field as the search criteria. Adjust the date range, and click **Create filter**.
4. Select “Apply the label” and “Choose label...”.
5. Choose **New label** and create a new label named “Training”.
6. Select “Never send it to Spam” and “Always mark it as important”.
7. Select “Also apply filter to X matching conversations”.
8. Select **Create filter**.
