

Activity 2: Understand Collaborator roles

In this activity, you explore your permissions to access folders that have been shared with you.

Complete the following steps:

1. From Google Drive, select **Shared with me**.
2. Locate a folder that has been shared with you.
3. Point to the folder name and right-click, then select **Share**. What permissions do you have, and can you share the folder with your permissions?
4. Click **Get link**. Can you share a link with your permissions?
5. Repeat the previous two steps for some more folders to gain an understanding of how your assigned role affects your permissions.
