

Activity 2: Create a space and add a thread

In this activity, you create a space and add a thread.

Complete the following steps:

1. From Google Chat, click **Start a chat**, then select **Create a space**.
2. Enter "Same Day Delivery" as the name of the space.
3. Click **Add people & apps** and invite a few colleagues in your group to the space. Remember to inform them that you're completing a training exercise.
4. Send a message in the chat that says "Good morning team!"
5. To separate topics in a space, use a conversation thread. Point to the message that you sent, and then click **Reply in thread**.
6. Enter a message and press or click **Enter** to create the thread.
7. If you invited some colleagues to the space, ask them to create their own threads so you can see threading in action.
