

Activity 4: Use an app in a space

Now it's your turn to try using an app.

Complete the following steps:

1. Return to the "Same Day Shipping Project" space that you created in Activity 2.
2. Click **Add people & apps** and type "Giphy" into the search box.
3. Select **Giphy (App)** from the list of results, and then click **Add**.
4. After **Giphy** is added to a conversation or space, the app sends a message that describes how to use the app. Review these instructions.
5. In Google Chat, you can use /slash commands in messages to communicate quickly with apps. To send a GIF of cats, type **/giphy cats** into the message box. Then click **Send Message** to share a message with the first GIF matching this query.
