

Business challenge: Online ordering and delivery

In this activity, you apply what you've learned about Google Chat by helping On the Rise solve their business challenge.

During this activity, you work independently and with a group to complete five tasks.

You use the group chat and space that you created earlier in the course. Ask the other members of your group chat and space to participate by replying to your chats, and creating new threads where necessary. But don't worry if you have to complete these tasks alone. Just follow the instructions as closely as you can.

You use files from the course drive as part of this activity. To ensure you can locate them easily when you need them, complete the following steps:

1. Click this link [Same-Day Delivery Flyer](#) to open the document from the course drive.
2. Close the "Same-Day Delivery Flyer" tab.

Task 1

Anthony wants you to communicate with everyone working on the Online Ordering and Delivery Project by using a group chat. Send a message in the group conversation welcoming them to the team, then edit your message.

Complete the following steps:

1. Return to the group chat you used earlier in Activity 1.
Note: If you did not create a group in Activity 1, use the space that you created in Activity 2 for this task.
2. Send the following message to the group "Hi everyone, welcome to the team!" and send it.

3. Then, edit your sent message by changing it to say, "Hi everyone, welcome to the team! I'm excited to work with all of you."

Task 2

The team members have a lot to say and post numerous messages sharing cool ideas in the group chat. You signal your agreement by adding a few reactions and replying. You know you want to discuss their ideas with Anthony later, so you forward two messages to your Gmail Inbox.

Complete the following steps:

1. Read and respond to messages that your group members have sent in the group chat.
Note: If your colleagues are unavailable to chat, consider sending your own messages, so you can complete the next two steps.
2. Signal your approval by adding a reaction to several messages.
3. Choose two messages that you received and forward them to your Gmail Inbox.

Task 3

Now that the team has become acquainted with one another, Anthony asks you to help schedule a team kickoff meeting. You decide to use Google Calendar within Google Chat to schedule a meeting for the team.

Complete the following steps:

1. Click **Google Workspace tools** (it's the circular button with a plus sign in the middle).
2. From the list of options, choose **Calendar invite** to open Google Calendar in a panel on your screen.
3. Click **Add title** and change the meeting title to "Project Kick-off Meeting."
4. Select next week Tuesday at 1pm as the meeting time.
5. By default, everyone in the conversation is included as a guest when a calendar invite is created. Leave this information unchanged and click **Save & share**.

Task 4

The team had its first meeting and many people raised good points about the advantages and disadvantages of same-day shipping and overnight delivery. At the end of the meeting, Anthony suggests creating action items for everyone based on the discussion topics from the

meeting. You decide to convert the group chat into a space so you can easily assign tasks to your team members, including yourself.

Complete the following steps:

1. From the group chat name's drop-down, click **Turn this chat into a space**.
Note: If you didn't create a group chat, you can skip this step. Use the space from Task 1 of this activity to complete the remaining steps.
2. Type "Delivery and Shipping" for the space name, choose an emoji, and click **Done**.
3. To create a task, navigate to the **Tasks** tab within the space, and then click **Add space task**.
4. Create a task with the following information:
 - Title: "Ask the marketing team for a flyer"
 - Date: Two days from today
 - Assignee: You
5. Use the **Google Workspace tools** in Google Chat to share the [Same-Day Delivery Flyer](#) within the "Delivery and Shipping" space.
6. Mark your task as completed.

Task 5

Anthony would like the team to continue their discussions about same-day shipping and overnight delivery. He asks you to create a thread for each topic. Later, Anthony asks you about the message you sent comparing same-day delivery to overnight shipping. You can't remember exactly what you said. To find your original message, you use the search function in Google Chat to open the thread.

Complete the following steps:

1. Return to the space named "Delivery and Shipping" that you created.
2. Create a thread about same-day delivery, and a second one about overnight shipping. Be sure to include the words "delivery", "shipping", and "faster" in your messages.
3. @mention one of the other members of the space.
4. Use the search function in Google Chat to look for the words "delivery", "shipping", and "faster".
5. From the search results, select the relevant messages and open their threads.

Case wrap up

The team continues its rich discussion of same-day delivery and overnight shipping in Google Chat. Anthony catches up on the conversation using Google Chat auto-generated summaries. After everyone's tasks in the team's space have been completed, he schedules a follow-up conversation using the Meet for Google Chat app. The team convenes again and decides the first project they roll-out should be same-day delivery in cities where On the Rise already has bakeries. If it goes well, On the Rise will then start to also use overnight delivery so customers in more cities can taste their wonderful baked goods.

Anthony thanks you for your help coordinating the project using Google Chat. With your help, he is confident that On the Rise has chosen the right way forward!
